Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that were tested under ANSI C63.19-2007, and that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007, include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operation?

N/A

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

N/A

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: www.apple.com/support/hac

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Apple maintains an accessibility website at www.apple.com/accessibility/. This website includes web pages describing iPhone accessibility features and solutions for those with hearing loss, including iPhone support for FaceTime video calls, closed captioning, messages with iMessage, mono audio, visible and vibrating alerts, visual voicemail, hearing aid-compatible induction ear loops, and TTY. Additional information on accessibility is available on this website, including through Apple's Voluntary Product Accessibility Templates, which describe how iPhone addresses accessibility guidelines under Section 508 of the Rehabilitation Act. The Apple accessibility website also includes an email address/link (accessibility@apple.com) which allows customers to provide Apple with feedback, comments, or questions regarding accessibility products or solutions offered by Apple.

In addition, for iPhones certified as hearing aid compatible, Apple provides hearing aid compatibility ratings both on its website at www.apple.com/support/hac and on the iPhone box label. Apple also includes information on hearing

aid compatibility in the online iPhone User Guide accessible through the iPhone and on Apple's website at support.apple.com/manuals.

Finally, Apple participates in the Mobile Manufacturers Forum Global Accessibility Reporting Initiative ("GARI"), a project that helps consumers learn about handset accessibility features, including hearing aid compatibility. Information about Apple handsets is available through GARI's website at www.gari.info, as well as through the Access Wireless website (www.accesswireless.org) operated by CTIA-The Wireless Association.

Hearing Aid Testing

How many handset models were tested for hearing aid compatibility during the reporting period? 2

Report Remarks

All current iPhone models are compatible with Made for iPhone hearing aids. The Made for iPhone hearing aid platform enables compatible hearing aids to interact directly with iPhones via a digital wireless connection, dramatically improving the user experience for individuals with hearing loss. Hearing aids incorporating support for the Made for iPhone hearing aid platform provide outstanding sound quality, enable many helpful new features, and are easy to set up and use. There are now over 15 models of Made for iPhone hearing aids from 3 different manufacturers covering a range of prices and degrees of hearing loss. Additional information about the Made for iPhone hearing aid platform, including a list of compatible devices, is available at www.apple.com/accessibility/ios/hearing-aids/.
